## Education

### University of Waterloo

Waterloo, ON

Bachelor of Mathematical Statistics, Computer Science Minor

Sept 2021 - April 2026

- **Courses:** Stochastic Processes, Sampling and Experimental Design, Applied Linear Models, Data Analysis, Investment Science
- **Additional Certifications:** Actuarial Exam FM, Actuarial Exam P, SQL and Tableau for Data Analytics (Coursera)

## Work Experience

### TD Bank

Montreal, QC

Data Science Intern (Residential Analytics team)

Jan 2024 - May 2024

- Optimized the **data extraction** process, reducing the time required to extract website inforce and unbounded data from 30 minutes to approximately 1 minute by converting **R code** into streamlined **SQL scripts**.
- Developed comprehensive **sales summaries** using **pivot tables** to analyze competitor premiums by province, region, and city, aiding in increasing residential insurance prices by 16.5% for Q2.
- Constructed a comprehensive **cancellation monitoring tool** using **SQL** to restructure customer contract data, facilitating real-time tracking of renewals and cancellations for various products, boosting overall client retention by 22%.

### TD Bank

Toronto, ON

Data Science Intern (Modelling Analytics team)

May 2023 - Aug 2023

- Revamped customer experience strategy by managing advisor utilization using a **modular framework**; forecasted to deliver \$5mm in cost savings and increase customer retention by 20%.
- Designed a **Python-based modular framework** utilizing **Pandas** and **NumPy** for data manipulation, paired with **SQL** for robust data extraction, reducing the overall forecasting process time from 30 minutes to 10 minutes per launch.
- Aggregated legacy Cisco data and the newly acquired Genesys system to create an **SQL report**, streamlining the analytics reporting process and reducing report generation time by 50%.
- Implemented **RidgeCV** and **Linear Regression** models from the **scikit-learn** library to forecast call center metrics, improving predictive performance and strategic planning capabilities within the analytics team.

### Desjardins

Toronto, ON

Actuarial Science Intern (Auto Pricing team)

Sept 2022 - Dec 2022

- Generated monthly **SAS code** to complete the new-business-progress report to help determine company efficiency in dealing with fraud.
- Developed and executed rating profile batches in **Microsoft Excel**, utilizing **WTW-Radar** to extract premium data for the Nova Scotia Pre-NeXT filing, streamlining the digital initiative for instant online quoting.
- Reviewed the **New Brunswick Segmentation** model with considerable scrutiny to ensure clarity and correspondence between **WTW-Radar** and **R models**.

## Volunteering

- **UW Aerial Robotics** 🤖, *Autonomy Engineer*. Designed drone navigation logic using **Python**, integrating **YOLO** for landing pad detection with **NumPy** and **PyTorch**, and optimized waypoint tracking using **Euclidean distance** calculations.

## Projects

- **What Game?** 🎮 : Developed a **Python** and **Streamlit** app using **cosine similarity** with **scikit-learn** to recommend games based on IGDB API data, enhanced with **seaborn** visualizations.
- **What Image?** 🖼 : Built an **image captioning model** in **Python** using **CNNs** for image feature extraction and **RNNs (LSTMs)** for generating text captions, leveraging **PyTorch** to construct and train this multimodal architecture.
- **Drake vs Kendrick** 🎵 : Conducted a comparison of Kendrick Lamar and Drake's song popularity in **R** using **k-Nearest Neighbors (kNN)** classification and **exploratory data analysis** to analyze play distributions and distinct artist features.
- **GameStop Stock** 📈 : Modeled GameStop (GME) stock volatility in **R** with **linear regression**, **influence metrics**, and **robust regression** (using **gradient descent**) to address outliers and highlight influential trading days.
- **Edmonton Oilers** 🏒 : Assessed Edmonton Oilers' goal-scoring patterns in **R** with **Poisson-based MLE** and **MDE** for goal distribution, applying the **Horvitz-Thompson estimator** to evaluate **bias**, **variance**, and **MSE** in home vs. away goal averages.
- **MartMetrics**: Currently working on a sales forecasting model using the Walmart Kaggle dataset and **XGBoost** in **Python**, leveraging **time-series decomposition**, **hyperparameter tuning**, and **cross-validation** to predict sales trends and support strategic business insights.

## Skills & Interests

**Languages** Python, SQL, R, GraphQL, VBA, Tableau, HTML/CSS

**Technologies** NumPy, Pandas, Scikit-learn, Matplotlib, OpenCv, PyTorch, Tensorflow, React, spaCy, MySQL, Ggplot2, Dplyr, Survey

**Interests** Gym Fanatic, Watching F1, Fan of Liverpool Football Club, Fan of Raptors Basketball team, Love Go-Karting and Sim Racing
